New Federal Reserve Board Takes Office

FIVE of the members of the new fed Peral reserve hourd were inducted into office with due ceremony. A sixth, Raiph W. Morrison of Texas, was to

> sworn in. The seventl member had not yet dent Roosevelt, Marfor chalrman, and M. S. Szymczak of Chlcago, were holdovers. The others besides Ransom, Atlanta bank-

er: John McKee of Ohio, former chief bank examiner for the Reconstruction Finance Corporation,

and Joseph A. Broderick of New York. The reserve hoard, which has been called "n snpreme court of banking." has powers imparalleled in American financial history. Among these is anthority to double present margins that member banks are required to maintain against deposits; the dominant voice on the open-market committeewhich charts the system's participation In the government bond market, and over which it had no authority nnder the former law; power of veto over the beads of the various reserve banks which insures the selection of a president who will co-operate with the board, and the power to fix margins governing relations between banks and

President Asks Repeal of Three AAA Acts

I N A surprise message to congress President Roosevelt recommended the prompt repeal of three acts auxillary to the AAA. These are the Bankhead cotton act, the Kerr-Smith to bacco act and the potato control act. The first named is the only one whose enforcement has been attempted and its validity is up for decision by the Supreme conrt. In view of the coart's decision havaildating the AAA it was agreed by everyone that there was no value in keeping the three auxiliary acts on the books.

New Farm Program Bill Comes Up in Senate

WHAT ts known as the Bankhead-Jones bill for soil conservation, the administration's substitute for the AAA, was given the besitant approval of the senate ngricultural committee by a vote of 15 to 2, although Chairman Elttson D. Smith of South Carolina said he "personully had some doabts" as to its constitutionality. The measure would enable the secretary of agriculture to remove 30,000,000 acres from coltivation and give him even wider powers than he bad under the AAA. It was evidently headed for a bot debate on the senate floor.

Dickinson Also Has Program to Save the Farmer

EVERY Presidential possibility these days must have some plan for the salvation of the American farmer. Senator L. J. Dickinson of Iowa, often mentioned for the Re-

publican nomination, new brings out his permanent farm program which he says would allvorce the farm problem from "bureaucratic control" In Washington, Illis idan would embrace eresion centrol, soll conservation, and resteration of fertility of would be handled

highway construction.

Dickinson

THE PARTY

Administration jointly by the states and the federal government in a minner similar to

The Dickinson program, similar to that advocated by former Gov. Frank O. Lowden of tillnols, includes payment of the bulance due signers AAA contracts, a higher tariff on farm products, continued corn loans, and extenston of furm mortguges at a low

Inflationists Ready for Battle in Congress

INFLATIONISTS in congress, led by Senator Thomas of Oklahoam and Representative Patman of Texas, were all prepared to wage a great battle to force the printing of new money. They were just walting for the introduction of a new tax program, declaring they would try to block such legislation is attempted. It was believed that, if the tax issue were not raised soea, the fight would start over the Frazier-Lemke farm mortgaging refinancing bill.

The forces behind this bill, which calls for the refinancing of farm in debtedness on easy terms through the Issuance of up to \$3,000,000,000 in new money, and succeeded in getting 2t5 signatures on a petition to force a vote the house. Only 218 were needed and its backers were pressing for the tares mames.

Administration teaders were confident they could defeat the inflationists by a wide margin.

around the NATIONAL CAPITAL By Carter Field The tentative tax program being considered by the administration calls for 500 millions of excise taxes for sub-

tax plans are being worked out in the Treusury department, and Secretary Morgenthan is waiting for an invitaand means committee, which Chairman Doughton, not wanting any more taxes at all, is loath to give,

The A. F. of L., which them, they won't fight lt,

Another plan being worked out by the young men in the Treasury department, none of whom, by the way, gives any consideration to political questions whatever, not even considering that this is a Presidential election year, goes for the smaller incomes in a blg way. It is more drastic than the proposal of Senator La Foliette last year, suggested as a substitute for President Roosevelt's tax program.

To start off with, it boosts the narmal Income tax rate from 4 per eent to 8 per cent. Then It reduces the exemption of a married person from \$2,500 to \$1,500, and a single person's exemption from \$1,500 to \$750. Fur-JOSEPH B. eretion to curb the shipment of such Smith Stirs Them

Al Smith's biting criticism that the Roosevelt administration has done nothing toward carrying out its platform pledge about consolidating governmental agencies in the interest of economy has resulted already in several moves coming closer to the surface. They were already in the wish stage, but their backers were afraid Now they are emerging.

For Instance, the Federal Deposit Insurance corporation. For some time it has been looking covetously at the functions with respect to banks exerclaed by Jesse Jones' Iteconstruction Finance corporation. FDIC helieves that It. and It alone, should make loans of government funds to banks. It has the power ander the law, but just recently it made the first open love, loaning \$2,828,000 to a bank in

Bethlehem, Pa. FDtC's idea is that it should not nfine its functions to paying off depositors after a bank has closed, but that it should be in close touch with the bunks all the while to see to it that they are kept sound. Also, that If they money for legitlmate reaneed any sons it is FDtC that should pass on

the situation and loan the money. incidentally FDIC is on Easy street financially. Ita net losses in two and a half years have been only about \$2,-

500,000. Its nct profit has now mounted to a nice nest egg of \$67,000,000. Under the law it cannot change its assessments on the banks, which run one-twelfth of 1 per cent on deposits each year, payable in two seminnmai

It is having an argument inside the rganization over whether this present legal rate of assessment is not no unecessary hurden on the hanks. Some of its advisers believe that just one more semiannual installment should necessity should arise. Each semian-nual installment brings in from \$33,-000,000 to \$35,000,000.

More Consolidating

tice of the new heads of the Federal. Morgenthan is waiting for an invita-tion to appear before the house ways and means compilities which Chernys. Hittle consolidating of government ngencles, complying with the 1932 platform pledge by taking over FDIC, lock, stock and barrel, and turning it into a bureau of the tleserve system.

Director Crowley, of FDIC, sees very little virtue in this suggestion, nlmost ns little as Jesse Jones sees la Crowley's ambitions to take away RFC's grlp on a great many banks scattered over the country.

Meanwhile great impetus has been given to the old move to unite the investigating hodies of the governments. Virtually every department has one starting off with the original secret service in the treasury, now very much overshadowed by the hureau of Investigation in the Department of Justice.

But virtually without exception every department wants to keep its own service, and Insists that much of the value to its particular objectives would be lost if its investigators were made part of a general organization, spread out over the whole government.

The State department is particularly sensitive about any litea of merging its investigating work with that of the others. State department officials be lleve that the vital need of secrecy in lts operations precludes their being "bundled nbout," as they put it, all over a huge national detective force, tn a way, it all gets back to what Herbert Hoover said about the bears when he was secretary of commerce One kind of bear was under the tuterlor department, another under Agriculture, and a third under Commerce. President Harding went to Ainska to straighten out that sort of thing, and cut red tape. But the bears are still under the three departments!

Clever Miss Perkins

Just one prominent pro-Roosevelt figure in all Washington showed long range political intelligence on commenting on the Al Smith speech at the American Liberty league dinner. This was Miss Frances Perkins, sccretary of labor. And by a strange coincidence it is the first time since inauguration that Miss Pedkins has done this year. The income tax plan interested observers was really of poworld be far too anapopular to be put litical henefit to the Rooseveit cause. anything which in the online of dislitical henefit to the Rooseveit cause. What Miss Perkins did was to keep

the door open for Smith to come back -and to avoid doing anything to make Smith or Smith's followers any madder than they already were. In short, she not only served notice that the door was open for him to come back, but put out a welcome mat Instead of erecting a harbed wire entanglement.

Which latter is precisely what most of the vocal Democrats on Capitol Itili did. And this goes not only for the hot-headed Southerners, like Senaor James F. Byrnes of South Carolina and Speaker Joseph W. Byrns of Tennessee, but for supposedly cold blooded northern Democrats like Representative John J. O'Connor of New York, chalrman of the house rules committee. His remark that "of all people, Smith should be the last to attack thoosevelt," reflects the thought very aceu-rately of most of the Roosevelt Insiders, but is not calculated to pacify the Smith following.

And the importance of President Roosevelt's re-election in gratifying million Mr. Hoover would be nomithe feelings of Roosevelt lasiders is not very great. The President has ty, Both of us came ont even, He anved those votes anyway. Highly significant his million. I kept my twenty. In connection with Chairman O'Connor's remark also is the expected hattle to oust James J. Dooling from the Tammany leadership it known for some time that Postmaster James A. Farley wanted a change in the Tammany control. He wanted one of his own men, about whose loyalty to Boosevelt there could be no question, in the saddle at the Wigwum,

Promises Fight

romises Fight

While Southern statesmen, thinking Brooklyn bridge every day than go they were doing Roosevelt a favor. were raking up the bitter memories of 1928, and citing Smith's disappointment then and in 1932 as the reason for his present attack on Roosevelt. some New York Democrats, anxious for their own reasons to have a change in Tammany hall, nrged the administration to take command, and to prevent Al Smith from even heing a district delegate to the Phlladelphla conven-

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, nearitis or neuralgia, ask your doctor what he thinks about it—in comparison with Genuine Bayer Aspirin.

We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year

who have taken Bayer Aspirin year in and out without ill elicet, have proved that the medical findings

proved that the medical findings about its safety were correct.
Remember this: Genuine Bayer Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains ... and safe for the average person to take regularly.
You can get real Bayer Aspirin at any drug store — simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

When LINCOLN "Coached"

EHIND one of the most dramatic and Important moments in the unnals of the American people, in which Abraham Lincoln and General Grunt were the chief nctors, there Is an appealing human story that to this day remains virtually unknown. It is revealed in obscure and priceless original documents, says a writer in

the Washington Post.

The event to which the yellowing munuscripts relate is the uppointment of Grunt as lieutement general in com-mand of all the Union forces in the Ovil war, an epochal step taken by President Lincoln more than 70 years

Lincoln had watched with increasing satisfaction the military record of the stocky and theiturn Grant. With the victories ut Vickshurg and Chattanoogu, the President renched the decision to place him in command of ull the Union armies. To this resolve Lincoln held despite extreme pressure from numerous disaffected elements.

Grant was called to the White House and told of the President's Intention. Lincoln called Grant uside and told him he understood the general's "dread of public speaking," and in order to make things a bit easier on that score, he, the President, had written out "the few lines" he intended to say to Grant on the occasion of the formal delivery of the appointment.

With characteristic breadth of vision, Lincoln arged Grant to say something

In reply which not only "would be an encouragement to the North," but which also "would soothe the feelings of Jealonsy among other officers of the army."
Thereupon, Lin-

coin handed over to Grant the firmly inscribed manu-script of the re-marks he had prepared.

in the following words, I'resident Lincoln turned the course of history:

Gen, Granit

Gen. Grani:

The Nolloo'n oppreciation of what
yon have done, and its relinace apon
yon for what remains to do in the
existing greet alruggle, are naw
presented with this commission comstiteting you ilecteoset general in
the Army of the United States.

With this high henor devolves
upon you class a correspanding reopensibility. As the country harelis
trunts you, so, under God, it will
mantain you. I carreely need to add
that with what I here egenk far
the Nation gues my own hearty
concurrence.

Prepared as he had been by an "advance" of President Lincoln's remarks, General Grant replied:

Mr. President:

I eccept this commission with
gretitade for the high henor coeferred. With the sid of the cohin
ormion that here fought on so many
fields for our common country, it
will be my carned endeavor not
to disappoint your expectations. I
feel the fail weight of the responsibilities cow devolving upon me, and
i knew that if they are met it will
be due to those armies, eed chove
all to the fever of that Providence
which lends both nations and men.

LINCOLN'S PARENTS

A BRAHAM LINCOLN's mother and father were married June 12, 1800, in Washington county. Kentucky, by Rev. Jesse Hend, a Methodist preacher, who was also a justice of the pence.

black as though written yesterday; that of the Grant acceptance is quite finded, harely legible.

This, incidentally, is among the relu-

lively few pieces of Grantiana and Lin-colulana still kept in the Grant fumily

It is not unlikely that eventually also will find their way into the archives of the federal government which was held intact by the statesmanship of Lincoln and the military genius of

Grant. Lincoln had to bear the brunt of

heavy criticism in his appointment of Grant to succeed George Washington and Winfield Scott as the only lientenant generals of the United States army up to that time. Criticism came not only from officers of the army, as Lincoln noted. when he reminded Grant to sny some-thing to "soothe the feelings of jealousy." It came from many quar-

ters. It came from to Grant's linck of outstanding success at West Point, to his resignation from

the army and return to private life in 1854, to his thancial difficulties us farmer, storekeeper, und renl estate salesman. And it came from others who struck holier-than-thou attitudes, But Lincoln was not interested in Grant's past nor in his personal hubits As the Chief Executive, Lincoln was interested in just one thing-the winning of the war to preserve the federal union. Lincoln had tried many lenders

to gain that end-beginning with Mc-Clellan and running the gamut of the

Imrusides and the Hookers and others almost too numerous to mention Grant gave the dispirited North Its first thrill when he captured Fort Donelson, and when his answer to the Confederate General Huckner became public, he was known to every urchin as 'Unconditional Surreuder" Grant. He wrote to Buckner:

"No terms except unconditional and Immediate surrender caa he accepted. I propose to move immediately upou your works."

Grant's successes in the West were in striking contrast to the decidedly poor showing made by the communders in the East. Lincoln watched Grant all through the years of 1862 and 1863 Knowing full well the criticism which would be leveled at him, within the army and out, despite the remarkable record achieved by Grant, Lincoln nevertheless made his decision and went through with it.

So it was that the mau who had acknowledged himself to be a failure before 1861, received the highest milltary command within the power of the nation to bestow. He received it at the hands of an unerring judge of bu-man kind who felt he finully had found the leader he had been seeking for

tbree long and bitter years. Aud Grant had answered "It will be my earnest endeavor not to disappoint

Urged Freeing of Slaves As early as March 6, 1862, Lincoln urged congress in a special message to

To Lincoln

YOU were the Mind that planned To stem the tide Of menace to the land;

In Detroit News

You were the Voice to pray, "O men! to arms! It is the only way."

You were the Hand whose pen Struck off the chains From the dark limbs of men;

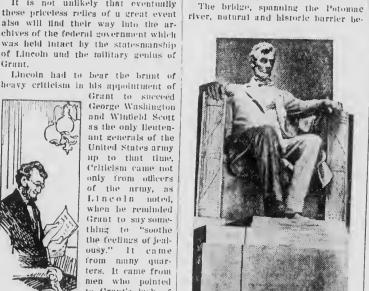

You were the Life that gave Union to all, But to yourself, the grave. You were the Love to see Freedom and joy For this humanity.

One Mind, one Voice, one true Vast Life and Love Lincoln, found home in you,

LINCOLN MEMORIAL WASHINGTON

MIE memorial to Abraham Lincoln in the National Capital is com-posed of four features—a statue of the man, a memorial of his Gettysburg address, a memorial of his second inangural address and a symbol according to the connection of one of the Union of the United States-the four things which the murtyred President held were his paramount objects. From the memorial to the west reaches a bridge, linking the nation's tribute to its Civil war President with the home of Gen. Robert E. Lee, mill-tary leader of the Confederacy, Gen-eral Lee's home, Arlington, now is Ar-lington National cemetery, where rest the dead of the Revolutionary war, the Mexican war, the houles of man who Mexican war, the bodies of men who that finally she succeeded. And now. fought with the armies of the bine and not only are her own trips to the

Statue of Abraham Lincoln in the Lincoln Memorial Building.

tween the North and South, links, more than in symbol, the two sections of the United States.

Henry Bucon, who died in 1924, was the architect who designed the Lincoln memorial und who said it should contain the four features. Daniel Chester French, famed American sculptor, produced the statue. This represents Lin-coln as the great war President, the man who brought the nation through Its titanic struggle. The two decoru-Iteunion, are by Jules Guerin.

Above and behind the massive head of Lincoln is inscribed in the wull:

IN THIS TEMPLE
AS IN THE HEARTS OF THE
PEOPLE
FOR WHOM HE SAVED THE
UNION
THE MEMORY OF ABRAHAM LINCOLN IS ENSURINED FOREVER

The Gettysburg address and the second inaugural speech occupy the north and south walls with the decorations. Simplicity is the keynote of the memorlal.

To the east front of the Lincoln memorial is the 2,000 feet long reflecting basiu in which are to be seen reflections of both the Washington usonument and the memorial. The basin is bordered by trees and walks and, with the memorial, is one of the world's most lupressive sights.

Arlington Memorial bridge follows in simple dignity the idea of the memorial; linking the monument of one great leader to the lost home of the leader of a lost cause. At the foot of the slope of Arlington, the roadway from the bridge ends and, ultimately, there will be roads and walks radiating from the classic road ending to the which lends both nations and men.

The manuscript of Lincoln's words

co-operate with any state for the gradual endury house, to the Tomb of the Unknown and to other points in the compensation from the government.

Constructive Suggestions or Complaints: Which Get Results?

are not as they should be. The other is to make constructive sugges-tions and request that they be foi The second appeals to his sense of good one and within reason, it is good suggestion in a good wny, and generally heeded. Assuming that, in both cases the thing gets done, in but the reckless, the first Instance, annoyance prevalls, while in the second, good will is fastered. You will remember the old adage that you can entch more fles with molasses, than vinegar. In seats, were sometimes called "bone fles with molasses, than vinegar. In seats, were sometimes called "bone fles with molasses, than vinegar. In seats, were sometimes called "bone fles with molasses, than vinegar." other words you can get more accomplished hy keeping good tempered and sweet, than by getting annoyed

and sour tempered.
Getting Things Accomplished. It is well to remember these meth ods for family use, and for civic purposes. It does not mean that one can get things done merely by being good natured. There must he a plus to it. There must be continual effort in the right direction, until the point is won. And when there has been no hard feeling crented, and the matter is seen to, there is likely to be a feeling of satisfaction on the side of both parties, each being pleased that a good thing has resulted.

It was by the recommended meth od that a woman succeeded in getting a bench put on a waiting station platform. She appealed to the correct authorities, telling of the genuine need for such a hench, as tired persons found it almost more than they could endure to stand from ten to twenty minutes, more or less car with another at this junction. At first, came a note stating that her request had been noted, and for mally thanking her for letting them know of her wish; nothing more, and nothing was done.

gray, the Spanish-American war and the World war.

Araucanians Descendants of One of Earlier Races

Centered around Temuco in the "Swiss" district of Chile is a settlement of about 100,000 Araucanians. They are descendants of one of the early rnces which the Spanlards found upon their arrival in the southern continent. During the time of the conquest these Indlnns were an aggressive, warlike people who successfully withstood the attacks of lavaders and held the distinction of being one of the few unconquerable tribes on the con-

tinent. The Araucanians were never brough into subjection by the Incas and were never conquered by the Spanlards. Throughout all the wnrfare and invasions taking place in the early history of the continent they managed to mainlain their Independence and were never completely assimilated. They did lose some of their territory, but in the Seventeenth century managed to regaln It all.

Today the Araucanians, who call themselves Manuches, meaning "people of the land," are dignified, peace ful people engaged chiefly in agricul-turnl and industrial pursuits—protected by law from exploitatioa.

Costnmes, massive silver ornaments. and coin brow hands such as adorned the first Araacanians still are in vogue among the moderns. The sorceress who cures all ills by driving employed in the religious ceremonles of hundreds of years ago are used in the celebration of today.

Isle of the Ottawas Is

Largest in Fresh Water The largest Island in the world, lying in fresh water, is the Canadian "Grand Manitonlin," the Isle of the Ottawas, in Lake Haron. It is nearly hundred miles long and has an area of 1,073 square miles. It has also called the "Isle of a Handre.I Lakes," for many benatiful lakes both large and small are to be found with-In Its borders

The spirit Maniton, the Great Master of Life, was believed by the Ottawa Indians to have created their ancestors and placed them on the Island in mach the same manner as Adam and Eve came to the Garden of Eden.

Champlain was the first European known to have visited these natives. When he arrived at the mouth of French river in 1615, he found some of them drylag blaeberries, and, because of the way they wore their hair, he referred to them as "the people with their hair done ap." they were unusually neat and clean, and had their hair more elegantly dressed than had the gentlemen of

Reason for a Mile

How many yards in a mile? Seventeen hundred and slxty-that's right. But that is un odd number of yards, Isn't It? Why not, say, 1,800 yards? It's like this. Up to the time of Elizabeth we used the Roman mile of 1,000 paces ("mile" comes from the Latin for thousand), and each pace was reekoned as roughly tive feet. But the people la various parts measured the thousand paces differently, states Pearson's Weekly, of London. To end the confasion that resulted, an English mlie was introduced-consisting of eight furlongs, or furrow-longs, from the length of a furrow made on furni land. Those furlongs were 220 yards ion, so we got our 1,760-yard mile.

Crossing the Date Line

Crossing the equator has nothing to ssing the international date line. which lies in the middle of the Pacific ocean and roughly corresponds to the one lumdred and eightleth meridian that the traveler loses or gains a day depending on which way his vessel is moving it is a joirely arbitrary ar congenion, med, necessary by our errol of motioning time. Sailing we los the diffe line, a day is lost and the card adds a day.

Cooling Eggs Newly lald eggs cool faster on wire trays than hi a galvanized bucket, wire basket, or in a wooden case, acwhich was rulsed to n city in 1925, cording to G. W. Knox, Jr., extension poultryman, University College of Agriculture, Arkansas, adding that when eggs are held in a room with a temperature of 50 degrees, eggs three layers deep on a wire tray require nine honrs to cool to 68 degrees, while eggs packed in a wooden tray require 38 hours to cool down to the same temperature. A clean room with n temperature of around 60 degrees and a high inmidity is the most desirable

Roup in Cool Weather

for holding eggs before they are mar-

Itoun in poultry is caused by one of two things: too much ventilation, or not enough. Too much ventilation can be easily detected—the hen house Is drafty. The cure, obviously, is to stop up the cracks and holes so as to shut off the excessive air circula-tion. If the cause is lack of ventithis can be detected by If there is not enough ventilation more windows should be opened on the front side of the house.

Says Zephyr Could Run on Half Power Wasted by Ordinary Train

The big, heavy train wastes hundreds of horsepower "churning up the atmosphere" to say nothing of the potential power that goes out the emokestack, he explained to engineer graduates of the University of Pennsylvania Of course, there is no way of utilizing that power but, if there were, he added, there would be enough of it to operate two of the light-veight stainless steel Zephyrs.

"The importance of streamlining is difficult to over-estimate when

PHILADELPHIA-Enough power | light-weight construction, Col PHILADELPHIA—Enough power is wasted by a conventional train to operate two light-weight, streamlined trains of the Zephyr type, according to Col. E. J. W. Ragsdale, regineer of the Edward G. Budd Manufacturing Co., a pieneer in the application of streamlining to railroad construction.

The big, heavy train wastes hundreds of horsepower "churning up"

Pilithweight construction, Col. Ragsdale pointed out that the convolutional train takes anywhere up to 15,000 pounds of rolling equipment to accommodate each passenger carried compared with about 2,000 pounds for a stainless steel train which has an equal factor of safety.

"The importance of streamlining is difficult to over-estimate when high speeds are involved," Cel. Ragadale said "Consider, for instance, that a man walking a mile has to replace three tens of air. This is easy to do because the air moves on seendingly magic been ings. But fet him try to walk that mile in a minut." He can't do it because the him try to walk that mile in a minut. He can't do it because the firm over the him try to walk that mile in a minut. He can't do it because the firm over trains. One of great for his strongth, and even if he were strong mough, he would lack traction.

"The sease principle applies to railroad trains. On Precedity, he stailed a strength to colve the stead of trying to colve the year."

Col. the sease place of the strength to railroad realize the railroad trains. On Precedity, he staileds attended that the stailed is strengthed trains, in the first pour influde, the railroad realizable is seen the controlled trains. In the first part of operation respectively to a strength to the colve the stailed strength and trains on the first is like filling the head of the stailed trains and the coats of the predecessors. Once Lephyrtype trains that have the coats and the coats of the predecessors.

Emphasizing the importance of lare annitality this record he said.

CHAPTER IX—Continued

He made the plane in short order and got the dend policeman to the cabin by way of the wing. Leaping off, he rushed back at top speed to meet Lillth. He had to go all the way to where he had left her.

She had slung the showshoes on her back, floundered through the first drift, and collapsed. When he came up, she was rubbing snow on her bared nnkle. She looked up at him, white-faced with pain and despair.

she sald. "Go back. It's all my fault. Hurry and save yourself. Maybe I can-delay hlm."

For reply, Garth swung her up tlme. He put all his strength into another burst of speed.

They came to the glacler strenm,

with no sight or sound of the pursuers behind them. Garth lifted the girl from his shoulder and set her on the front edge of the monoplane wing. He grasped hold to vanit up heside her. A bullet finned the girl's painwhitened cheek. Another bullet struck the wing edge between her and Garth. He jerked her down off the wing. The firing ceased. But the angle of the

After murdering Constable Illion but before starting to trail Garth, Huxby must have sent one of his men running along the foot of the tundra slope to take possession of the planes Garth had outrun the miner. But the wan had come within easy ride range and clear view of the plane-at least of its upper parts.

direction from which it had come.

Garth did not hesitate a spit second. He carried Lilith to the mooring tree and slashed the line with his knife Then, taking the girl pickaback, he set off up the stream hank.

fils one backward glance showed hint that the plane was drifting out Into the lake. But, the cross-wind had dietl down. The lessened stream current could be counted upon to carry the plane out beyond reach before it was stopped by the skim ice.

The ritleman up on the edge of the tundra was off to the right of the stream. Garth knew he had a thick screen of spruce trees and scrub nil the way to timberline. As he climbed, the man above began to yell and halloo. Garth had no doubt that the fellow was shoating about the outdrift

of the cabin plane. before long, other vells came from the lake shore. They were followed hy ritle shots. It was easy to guess that one or more of the pursuers had the supposition that Garth was hidman above told that he was running knew he had kept the fugitives from a starter. getting aboard.

ed his rush. Even so, his steady uphill slogging brought him near timberline before the four meugot together down at the lake shore. From the sudden stoppinge of the firing he knew the fourth man had explained the situation. Yet he did not

half a foot higher than his hend and over seven feet across at the floor

Low down in the wall he ent a hole, There was little more than space enough between the Igloo and the glacier front for him to crawl out. He hours beside a seal hole, at 40 below circled around the snow dome and the blg drift, through the thick swirl of snow, and recrossed the stream.

in the cave he found Lillth fur-bundled and hovering over the lamp, as you see anyone else than myself." she broiled thawed carlbon steaks on sighted the plane and opened fire, on a shank-bouc splt. He picked the girl den in the cockpit. The shouts of the her out and nround to the igloo. A man above told that he was running downfill, probably to let the others skins, the lamp, and enough meat for

> While she went on with her cooking, over the re-lighted lamp, he cut more blocks and bullt a low entrance tunnel from the door to part way around the curve of the Igloo wall. When he backed in, he blocked the mouth of the tunnel with a snow slab.

The Inside of the Igloo was already so warm from the lamp heat that the for the first time since leaving the place, he spake to Lilith; "Try hobling out farther from my neck, Miss Ramins and farther from my neck, Miss Ramins and Salphtest danger of it falling in the spaw melted, the moisclimbing faster than they can wade As fast as the snow melted, the mols ture was sucked outwards. It met the With less than a hundred paces, cold of the outside nir and froze hard, in a little while the igloo would be from the down-rolling clouds on the a dome of solld ice strong enough to western mountain side. A snow spit- hold the weight of a bear. The inting wind-gust whooshed asiant the terior was both warmer and drier than turdra slope. He turned sharp to the any tent, or any hut of wood or stone.

The girl had a stack of carlbou steaks brolled for film. He sat down, without a word, and began to eat. In was only an early antumn blizzard, the midst of the meal the smoke and heat became so stilling that he had to cut a two-luch ventilation hole in the

> All the time he gave no sign that he perceived the look of misery in Llith's eyes. But when he had caten his fill, he spoke a sudden order: "Bare your

She obeyed, tensely slient. He looked lose at the swellen aukle in the lamplight and felt it with his finger tips. Easy as was his touch, Lillth gasped

with pain. But he smiled his relief. "No hroken bone or dislocation; only a sprain. You'll soon be all right. Start packing it with softened snow, Keep It as cold as you can without freezing.

At that, all her pent-up emotion hurst out: "Oh, how you must despise Get you into this frightful dan me! ger-then go lame! A heipless, useless drag on you! That beastly coward-he'll hunt you out . . . marder you like the poor policeman. And all

my fault!" Garth shook his head. "You take too much of the credit, Miss Ramill. So far as regards Constable Dillon, the result would have been the same If you had stayed at Fort Simpson."

"But-but you can't get away !" Garth's smile hardened. "Neither Now tend to your ankle. ean they.

I'm going for meat." He dressed and crawled out lute the

hou meat from the lee cave and "Chop off a shank or two. We'll stacked it around the igleo. He had need bone spits," he said. "But that also set up blocks of snow-crust to warm some of the other skins and shape a drift of new snow in a certain

> elt and showed a blg hank of entgut. With his kaife he started to shape carlbon skins for parkas and trousers Lilith's eyes hrightened. She softened a length of catgut in the melted lampfat, and asked for a needle.
>
> All the remainder of that day of

death and storm, both of them plled awi and buckskin needle and catgut thrend. Neither was an Eskimo senm stress But their stitches though eoarse, were strong. By nightfall they finished the first carlhou-skin suitwaistlong seck-leggings, and parka with hood-front fringed with wolverine

After another meal of broiled meat Garth went out and climbed the lateral noralae to gather a quantity of enrihou moss from between the snow-drifts on the wind-swept tundra,

When he returned, Lillth lay asleep on one of the uncut skins. She had sunk down, completely tired out. Garth covered her over, blocked the roof hole with a chunk of soft snow, and spread hls own skin mat on the other side of the lamp from the girl. He lay down on it and snuffed out the light.

CHAPTER X

The Bedeviling.

Lillth opened her eyes as Garth finlshed his hasty meni of lamp-seared meat and fat. He explained about the lane. Her hands clutched together tlll they whitened.

"You-you'll be careful?"

"Never fear, I'll come back to look out for you. The storm has hlown out. Clenr sky, and about 10 helow zero. Keep treating your ankle, and work on your sult."

"But-how long?-" He handed her the knife, but took the belt-ax. "If I'm not back soon, it will not be till late afternoon or after dark. They may turn out carly, like myself, to have a look at their plane. In that case, I'll have to hide-out nil

"You'll freeze!" That won a smile from him, "This ls an Eskimo rig. I've sat in one for zero. Finish your own snit, and crawl out to enjoy the frost. Only, be care ful of that ankle. When outside, Leep

close to the igloo, and duck Inside It

She thing out her hands. "Oh, if only I could go along to help! I'm so afraid he'il tind you. All those guns-he and his meu-you, empty

Garth met the almost frantle ontburst with a look of cool lrony. "Do you take me for a chechahco? Mark this-that scoundred Huxby is the man who's In danger,"

With the assurance, Garth erent out through the tunnel, shoving his snowshoes ahead of hlm. Snow had conlinued to fall after the wind had died lown. That meant easy tracking. In the dlm starlight, he had to guess at the covering of his trall to the stream

Durlug the night, the last dwindling flow had choked the channel with anchor Ice, had flooded over the snow, and frozen solid. Garth took off his nowshoes and crept across the glare

lee without leaving any marks. On the other bank, he plowed a heavy trall up into the ice runnel, and brought from the stornge cave one of the remaining legs of curlbou. He left the meat atop the moralne, and started lowu the tundra us fast as he could travel by starlight.

Dawn was graying over the eas mountain wall of the valley when he neared the lake. He crossed over the frozen ford and went to peer at the three-seater plane in the growing twi-It stood much higher than he had left It.

A close view showed that the englneer and his men lind managed to raise the craft above water hy cribbing logs under the shattered pontoons. The top logs of the crlb brought the hottom of the floats level with the thickening skim ice. Long poles had been set to brace the wlags against the wind

Garth swung aboard. As he expected, all the food had been taken So also had been the bretter away. points from the magneto. Huxby no loubt had figured that the canon builder might repair the floats with rawhide, and run away with the threeseater. To balk the engineer, in turn farth helped himself to the breaker

He jumped back on the bank, and nushed eastwards along the shore in the dlm grayness. At first, thickets of from the insides of ships' bollers, and alders and willows cut off all view of a "tosher" is a waterman who searches the lake. He did not trouble to seek for stray hits of floating timber or stretch of partly open bank.

Though the gray dawn had grown a little less faint, he peered for several longing to the Steam Navigation commoments without sighting the calin lany is called a "Navvy," and the rivplane it seemed as if its pontoona dist have town served through by the Trenchard's Navy."-Tit-Bits Magazine.

He laid his belt-ax on a hind-quarter | storm. When at inst he came hack in, | sharp-edged sheet of ice, so that the

"Mountain of Hellfire"

Over a great area on the frontier between Baluchistan and Persla everything is dead. Not a hird, beast, or reptile, not even an insect, survives. They have been gassed by the "Mountain of Hellfire"—as the Persians call as in Isalah 63. Indeed, in Isalah 60:1, the volcano of Koh-l-Tafntan. The crater pours out dense clouds of nuimonlacal gas which destroy every living thing and even burn up all plant life, says Tlt-Bits Magazine.

This is the only mountain which produces this particular gas, but not the only one which exudes polsoa gas. In 1912 the volcano of Katmal In Ainska exploded, producing the higgest crater in the world, which is now known as the Valley of Ten Thousand Smokes. licre sulphurous gas streams out from rifts, and it is death to approach one

of these dendly vents.

The Sakuru Shima voicano in Japan olew up in 1914 and overwhelmed the city of Kugoshima. The loss of life was over 70,000, and a great number of these people were auffocated by pestilent gases which rushed up from earthquake fissures a long way from the mountain itself.

llefore the great Chilean earthquake of 1857 polson gas rose in the floor of the Bay of Payta and killed enormous quantities of fish and crahs. They tloated on the surface and were washed up on the beach, forming a wall-like line three to four feet high and twelve mlles long.

The most ghastly disaster of recent lmes was the destruction of the beautiful city of St. Plerre hy a cloud of gas and dust flung out by Mont Pelee. Within a matter of moments 40,000 people were hlotted out.

Dockside Slanguage

"Luters," scurfes," and "toshera" are among the quaint nicknames given to the workers in London's dockland. A "luter" is a man who clears mud from the beds of barges, a "scurfer" is one who scrapes away the crust an opening until he had covered a half dredges for a wet haul of coal. A coal hoat that ducks her funnel when humanity which constitute it what it is. she passes heneath the hridges is known as a "flat-iron," a vessel be-

JESUS' REPLY TO JOHN THE BAP. TIST'S QUESTION

But then he mide out vaguely a white shipe against the white of the snow-covered lee, A short dash brought him close to the grounded plane. It lay in shallow water suprounded by Question.

The litle, "Jesus Helps a Douhter," given by the lesson committee, is not a good one. John was not a doubter, though somewhat perplexed. Jesus specifically defeuds him against such a charge (see Matt. 11:7-11 as well as the present text). It is to be hoped that no teacher will perpetuate this John was a great man, In anerror. nouncing his birth the anget said. "He shall be great in the sight of the Lord." He was great, also, when measured by the standards of men.

John's Birth and Ministry Fore He was thought about and his work planned long before he was born. He came as God's messenger.

II. John's Character, Humble (Luke 3:4). He did not preme concern was to proclaim Christ, 2. Conrageous (Luke 3:7). He faced a great multitude and struck hard at their sins. He did not trim his message to suit the crowd.

111. John's Preaching (Luke 3:3-8). 1. He sounded forth a ringing call to repentance (vv. 3-6). Suddenly emerging from his seclusion, he come Into the region of the Jordan as a messenger of God, calling upon the people to repent as a means of preparation for the coming of the Messlah.

He demanded proofs of pen ltence (vv. 7, 8). He insisted that their faise prophets had to be abandoned, their sinful hearts had to be renovated, showing them that the vile passions of their souls must be uprooted. The turning of a soul from slu to God, was necessary.

IV. John Sent a Deputation to Jesus (Luke 7:19-23).

1. Their question (v. 19, 20), "Art

we for another?" Because John did not see the interval between the sufferlngs of Christ and the glory that should follow—between the cross of perpicxed; therefore, he sent a deputation to Jesus for light. This perpicalty once stepped into his snowshoes and once stepped into his snowshoes and leaded straight away from the shore cause the prophets did not see, or at least did not make clear, the interval least did not make clear, the interval between the cruchixlon of Christ and between the cruchixlon of Christ and knew, had to be the Lamb of God which taketh away the sin of the world (John 1:29). The trend of events puzzled him. It was not a lack Emits Ammoniacal Gases of falth, but confusion of mind, that prompted his inculry. There were two lines of predictions concernin the Messiah; the one set him forth as the saffering One, as in Isalah 33 the other as an invincible conqueror 2 the two are joined together (Luke

> 2. Jesus' netlon (v. 21). In that same hour, doubtless in the presence of John's disciples, Jesus cured many of their infirmities and plugnes, and of evil spirits, and to many that were blind he gave sight.

Jesas' message to John (vv. 22, 23). Jesus said to them, "Go way, and tell John what things ye have seen and heard." Jesus' Defense of John (Lake 7:24-28).

1. He declared that John was no vacillating like a reed awayed by the wind (v. 24).

John was not doubting hecause of the hardship of prison life (v. 25). 3. John was not a mistuken prophet (vv. 25-28). He makes John equal to the greatest of the Old Testament prophets by declaring that among those born of women there hath uot arisen a greater prophet than John.

4. The response of the people (v. 29). The people who heard this detense, even the publicans, accepted vindication of John. They justified God. They not only accepted the vindication, but were baptized with the bantlam of John.

VI. John's Martyrdom (Mark 6:14 29)

While John was in prison Herod had frequent Interviews with him John holdly told him that it was un lawful for him to have his brother's wife. He did not mince matters even with a king. This so enruged the licentious Herodias that she caused his death.

As love is deepest in the heing of God, so faith is the mightlest principle in the soul of man. Let us distinguish their several essences. Love is the essence of duty, faith is the essence of

Love and Faith

Humility and Pride Humility is the true proof of Christian virtues. Without it, we retain all er police are humorously dubhed "Lord our faults, and they are only hidden by orlde, which conceals them from others, and often from ourselves.

Sailors Are More Costly

RY THIS TRICK

ROLY POLY GOLF BALL

TIIIS is a dinner table trick that will startle all who witness it. The feat is performed with an ordinary golf hall, which the magician places on the table.

Making mysterious passes, he causes the ball to roll along the tablecloth, traveling in a most uncanny fashion.

Anyone may lift the ball and examine it

The motive power is furnished by a strong thread that runs beneath the tablecloth. On the end of the thread is a small metal ring, which the table-cloth bides. It Ia upon this nidden ring that the wizard places the golf

While his right hand makes its mystic passes, the magician uses his left to draw the thread, which makes the ball roll in a most natural fasision. The trick is made most effective by having a confederate pull the thread from the opposite side of the table. In this case the ball will roll away from the magician. WNU Service.

In boiling water five inlinutes, then drain and chill. For six peppers use the following: Two tablespoonfuls of with salt and pepper and add one-half cupful of stock. Mix well, stuff the peppers, place them in a little water In gent pans to bake. Cover the tops with buttered crumbs and when they nre well browned the peppers will be ready to serve.

White Sauce That's Different. Take one and one-half tablespoonfuls of corn oil, one tablespoonful of minced onion, cook until yellow, add one table spoontul of cornstarch, half a teaspoonful of salt, a dash of pepper and a cupful of milk. Cook until smooth nud thick and serve with any leftover

Creamed Chicken. Take two tablespoonfuls of olive oil or any vegetable oil, add a tablespoonful of minced onion, cook three minutes, add two tablespoonfuls of cornstarch, stir until well blended, then add one and one-half capfais of top milk of thin cream, one tenspoonful of sait, one-eighth tenspoonful of untineg, a dash of cayenne and paprika. Add two cupfuls of minced chicken. Serve on toast or in bread cases. A dash of current jelly is an improvement. Western Newspaper Union.

so unxlous to kill one so beautiful is something I cannot understand. For that matter, I don't understand why they want to kill any of us. If they really needed us for food it would be a different matter, but they don't. Have you been up in the Old Pasture

seen anything of Lightfoot?" Sammy nodded, "Fve been up there twice," sahl he. "Ohl Man Coyote has where Lightfoot was killed, but he

MARKET ROASTERS FOR EXTRA PROFIT

Way to Dispose of Surplus Heavier Breeds.

In seeking new ways to diversify their industry, eastern poultrymen have been experimenting with marketluz smalt lots of young reasters, during the last few years, using surplus males of such breeds as Plymouth Hocks, Rhode Island Reds, New Hampshire and Wy-

andottes. One of the best quality poultry meat products offered anywhere in the world has been the Sussex light roasters. English poultrymen have found that surplus males from the heavier breeds are highly desirable roasting fowls when tinished for the market during the full months and sold at an approximate weight of six pounds. Disposing of surplus males in this way has been found to be more profitable than selling them earlier us brollers or carrying them until the holiday sea-

son of inld-winter to be sold as roasters or enpons. Firmers who plan such a project however, should see that young roasters are property finished before being marketed. Keep them contined for two to three weeks and feed them a wet ninsh comparatively high in fattening Ingredients just before being sold. If properly done, such linishing will add from three-fourths to one und one-half pounds in weight and it with insure a

great Improvement in quality.

Tumor, Bumblefoot, Corns, Common in Poultry Flock It is a common thing to find upon the fret of old fowts enlargements of a rather hard nature that apparently give the bird no trouble. At thines, necording to an authority in the Itural New-Yorker, such growths or tumors become 'soft and display a formation of pus within, then opening and beolng obscesses. The majority of these tumors need no treatment, as they do not progress and do not injure Janltor-Can I get off this afteraoon | the fowl. If, however, they open, they may be treated tike any other abscess, given free opening with a strarp blade, that they may discharge their contents, be syringed out dally with a mild antiseptic solution and the bird kept upon etean, soft litter until henling occurs. Some of these abscesses, however, are of a tubercutar nature and not curable by any simple means,

These simple tumors-and any en-Inrgement of a localized nature upon or within the body is a "tumor"produce a condition calted "buiablefoot." Some Injury to the foot, such as might be caused by jumping from n high perch to a hard floor, or an injury from scratching, is assumed to be a frequent cause, though, where pus formation occurs, there must also he an infection by pus forming germs from within or without. "Corns" also occur upon the feet of fowls. When matlons need give the owner of the

blrd no concern.

Treating Wattle Disease Wattle Infection, or eilema of the wattles, is caused by an organism that lives in the solt, neeording to H. M. Scott, Kansas State college poultryman. The Infection causes the wattles to become tilled with n finld. Ja some instances, they reach huge proportions. Death may most practical way of dealing with the problem is to cut off the wattles with selssors and apply a dusting powder to prevent bleeding. The powder should be made of equat parts of

calomel and powdered burned alum.

Chicken-Killing Cats A cat that is a good monser and ratter and will not molest young poultry is invuluable about a poultry One that kitls chickens can do an enormous amount of damage, nverage cat of this character will take two chlekens of several weeks of age a day, and a greater number of smaller chicks, as tong as it has the opportunity to do so. Some of them are very sly about it. Often the wrong cut is suspected and sometimes the losses continue after the supposed offender is killed.

With the Poultrymen England's National Poultry council declares the Importation of Chinese eggs is a menaee to health.

Over 24,000,000 chickens were raised on Pennsylvania farms in 1934. They were valued at \$13,952,000, One of the most Important factors it.

turkeys be provided with a clean . . . Buckwheat middlings may be used in poultry mash in the place of wheat

successful turkey raising is that the

bran or wheat middlings. For a special high-grado trade eggs may be packed in neat cartons with an attractive "sticker" or seal guarantee-

ing the contents. Time required for incubation is directly related to the age of the eggs set. Those from 14 to 21 days old require from 14 to 18 hours longer for incubation than did those held less than eight days.
